This tiny e-book is the only thing you'll ever need to earn a profound online income for whatever needs or desires you want.

- With that being said, let's continue to my wicked free money generating strategy.

The Limitless Money Making Strategy

Really, the strategy is no brainer. Maybe you will kick yourself in the nuts or maybe not, but hey, who could even possibly think of this strategy for literally generating free money online? (Whatever is it, just please don't hurt yourself ☺)

The truth is, the strategy is very simple and easy and it does not require any work at all. (Actually I think it's the only, one of a kind).

Please, don't excite too much and run toward the goldmines without you first finish reading. After all, there are few rules you need to obey to succeed with this strategy.

Let's start then, shall we?

The infinite source of online income is - **Roulette!**

That's right! ONLINE Casino Roulette!

Now, let me explain something about roulette.

Roulette is one of the most underestimated online casino games in terms of earning money. Rarely who see the huge potential in roulette as a real infinite online income source. When you use the strategy that I'm about to reveal, you are going to fall in love into online roulette casino game.

Here is a picture of a standard online roulette:

(Depends on the casino the table might be slightly different, and as you can see so far I have generated €5,575.10 which I can withdraw and use ☺)

Most of us know that Roulette is a casino game where we can bet on numbers, columns and color. There are 36 numbers on a roulette table which 18 are black, 18 are red plus ZERO.

Now, I want immediately to FORGET about betting on numbers and columns!

⇒ What we are only going to focus on here is betting on color RED and BLACK!

⇒ By betting only on colors red and black our chances to earn money is 50-50.

About The Strategy:

First and foremost what you need to know is that this strategy does not work with all online casinos, in some the strategy does not work at all.

By the end of this eBook I'll show you which ones are the best for our strategy.

These are casinos that I personally use and suck money from. I strongly suggest that you only join at the recommended casinos noted bellow.

Now, let me guide you through the strategy first, then I'll show you the safest casinos.

After you join at a casino you want to head toward the roulette game.

When you join a roulette table the first thing you should do is FOCUS on playing/betting on the colors **Red** and **Black**.

Now I'll guide you with step by step examples how this strategy works, read carefully.

Scenario Examples:

Example #1: When you join roulette table, you are going to start your first bet with 1\$ on black or red (your choice). Let's say we placed \$1 on black, we spin the round and ball falls on black number, we win 2\$

Scenario #2: We bet 1\$ on red and ball falls on black, we lose 1\$.
Now, what we do here is we **DOUBLE** our bet on the **SAME COLOUR**, in this case, we bet \$2 on red and if the ball falls on red we win **\$4!**

Scenario #3: We are going to start our bet on red. Starting with \$1.
Ball falls on black.

We lose 1\$.

Now **we double** on red, betting with \$2

ball falls on black.

We lose \$2.

We **double our bet**, placing \$4 on red

- ball falls on black, we lose \$4.

AGAIN, WE DOUBLE OUR BET ON THE SAME COLOUR: RED

placing \$8 - ball falls on black we lose \$8.

AGAIN, DOUBLE THE BET ON THE SAME COLOR WE STARTED:

ON RED, placing \$16 - ball falls on RED = **WE WIN \$32!**

Refer to the more visual example bellow if there any misconceptions.

Here is a REAL EXAMPLE:

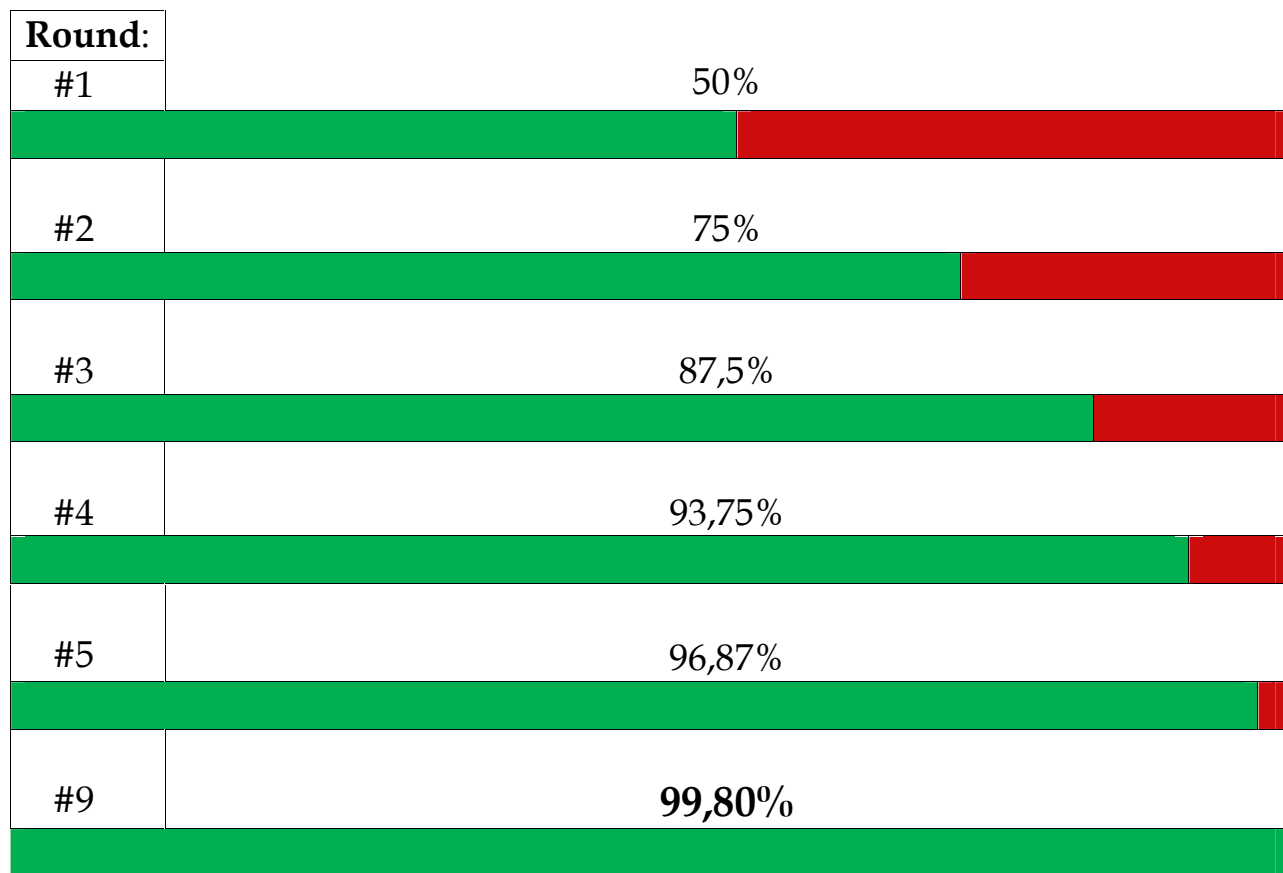

Rounds	Your BETS:	ON:	Ball ON:	Winnings:
Round #1>	\$1			\$0
Round #2>	\$2			\$0
Round #3>	\$4			\$0
Round #4>	\$8			\$16
You WIN! Begin Now Your Bet Starting From \$1				
Round #1>	\$1			\$0
Round #2>	\$2			\$4
You WIN! Begin Now Your Bet Starting From \$1				
Round #1>	\$1			\$0
Round #2>	\$2			\$0
Round #3>	\$4			\$0
Round #4>	\$8			\$0
Round #5>	\$16			\$32
You WIN! Now Begin Your Bet Starting From \$1!				

Most people play online roulette by guessing numbers and unnecessary change colors.

If you think for a moment, you'll see and realize that by playing wisely you can constantly win and generate as much real money as you like via online roulette with my proven strategy.

By double our bets on the same color our chances to win are increasing, refer to the table below:

POSSIBILITIES EXAMPLE THAT YOUR COLOR WILL TURN OUT AT LEAST ONCE

As you can see each round, your chances to win is increasing. And that's the reason why you should never change the color until you win.

➤ Got the point?

See how simple and easy is? But eh, who knew? But now when we DO KNOW... SKY IS THE LIMIT, XO XO XO ! :D

But Martin what if turns 0?

➤ That's a GREAT QUSTION!

What you need to know about 0 is that when you play you don't need to take into account that 0 is 0. If ball falls on zero, zero means that it's the **OPPOSITE** of the color you are betting on.

- When you play on red: zero is not zero - It's Black!
- When you play on black: zero does not mean zero - It's Red!
- Never play on zero and NEVER CHANGE COLOR If it's ZERO

Got it?

- Good.

The 2 GOLDEN RULES You Need to Obey:

1st: When You Win, ALWAYS START YOUR FIRST BET WITH \$1!

2nd: Always DOUBLE Your Bet On THE SAME COLOR Until You Win!

- And after you win Always Collect your Winnings!

Those are the golden rules you need to follow each and every single time in order to constantly win and generate money at roulette.

Recap: when you start your bet on color you chose, never change that color until you win! After you win collect your earnings and always and forever start your first bet with \$1 and always and forever double your bet on the same color until you win. The reason for doubling our bets each round until we win is to always generate profit.

Can I lose money with this strategy?

There is no way to lose with this strategy, except if you don't have enough money in your account balance.

Now in order to start generating free money, first you need to deposit some, this I call 'The Safe Bank Deposit'. Casinos offer several deposit options.

What you need to know is that casinos only cash out via the method you used to deposit. So I recommend to use Bank Transfer or Neteller.

By bank transfer you will get your money on your bank account through the credit card you deposited.

What is Neteller?

Neteller is a very trusted, safe and secure online bank account. It's same like paypal, it's used for making online payments at online stores and mostly used for receiving payments from casinos. It's perfect for our needs.

When you request a withdrawal from a casino they will send your money within 24 hours in your Neteller account, where you can then move that funds to your local bank account easily and have access to use them.

If you want to have instant access to your neteller funds, you can have by requesting a free Net+ card, which is a credit card similar the one you have from your bank account. Thereafter from Net+ card you can instantly have access to your Neteller funds and withdraw them from any local ATM.

Now why I love Neteller so much is because you can cash out your money instantly at any ATM worldwide through their Net+ service.

How much money I need to deposit?

To give you a lift, the trusted casinos bellow offer up to 100% bonus on your first deposit. In order to effectively play, and stay on the safe side I recommend depositing at least \$75. (\$100 it's recommended)

My Safe and Trusted Casinos I use:

#1 www.royalpanda.com – My favorite. When you join you will get 100% bonus on your first deposit. When you click on the ROULETTE tab go play in **European Roulette** or **Roulette Professional Series**, in roulette professional series a window will pop up and select **[Standard Limit: \$1 - \$500]**

- Min Withdrawal: \$10
- Transaction time: Instant

#2 www.slotsheaven.com I call this my 2nd ATM cash-machine :D Offers 200% First deposit bonus, Up to \$400.

- Has software download, so you could play instantly from your desktop.
- Min withdrawal: \$10 | Processing time within 72 hours.

#3 www.mrgreen.com – MrGreen casino offers first Deposit 100% match casino bonus. Withdrawals processed within 24 hours. – Great casino to generate and double your income.

- **Hints:**

- Make sure the roulette table maximum bet is \$500 or more.
- Some casinos have multicurrency, on the other casinos, I play with (€) currency, because it's slightly expensive than \$:D
- Don't generate entire wealth in one casino, if you aim to generate 10k join on at least two trusted casinos above.

Misconception #1: Do I always DOUBLE my money?

Example: you won on the fourth row which is $\$8 + \$8 = \$16$

– Does this mean that I earned profit of \$8 or \$16?

- The answer is neither.

The correct answer is that you generated profit of \$1.

- Further explanation: your bets: $1 + 2 + 4 + 8 = \$15$ but you won \$16 which means you generated 1\$ profit.

In other words, you spend \$15 but won \$1 which means \$1 profit.

– What a revelation eh? :D > I know it's kind 'a funny thou, but these tiny details are important to notice ☺ This is why it's important to always double your bet until you win, so you can constantly generate profit of 1\$.

That's the HEART of the strategy and how we are going to generate limitless income .

Now, you may seem like 1\$ is not much, but do you see the bigger picture?
Do you realize the REAL POTENTIAL of this strategy?

\$1 is generated WITHIN SECONDS!

The real secret of this strategy is the power of **TIME and **\$1!****

If you let yourself to see the bigger picture here, the few spins you are going to make in each round will cost you **just a few seconds** - and generate \$1.

If you aim higher and envision the long term you will realize that by continually playing and sticking to this strategy within 30 minutes you will earn at least **\$50 - \$70!!!**

If you triple those 30 minutes, it's Hour and a half. For 1h and 30 minutes you can generate at least **\$150!**

⇒ **(THE BIG PICTURE):** if we calculate $\$150 \times 30 \text{ days} = \4.500
PER MONTH MINIMUM!!!

And remember: \$4.500 generated WITHIN Hour and a Half!

- Imagine how much you could be generating if you play for 3 or even 6 hours?!!!

- Yeah! That's Right!

Now DO YOU SEE AND FEEL THE POWER of \$1?

Exactly! That's how I earn \$4.000+. Using my proven strategy we are literally trading time for money - very good chunk of money.

While we can spend the rest of our day with our family, loved ones and enjoy spending our tiny wealth on whatever we want.

(I may go deeper with the examples but the reason so it's because I needed to paint the real picture for you of the roulette potential!)

Cashing Out: Staying Safe and Secure

When you decide that you generated enough money and it's time to withdraw make sure that you spend at least 10% from your generated money on other games in the casino. The reason so it's because to by-pass the red flags, although I can't see any connection to the roulette, because it's opposite game, casino managers are too busy watching out over poker and other tournaments that are playing on the casino website constantly.

But I do recommend that you go and play other games to lose some money here and there before you request any withdrawal to make sure you are 100% safe and secure.

Also if you are going to generate a handsome of wealth, like 10-30k per month I strongly recommend that you join on at least 2 of the recommended casinos above to double your income and stay under the radar.

Conclusion:

So far u learned the newest untapped money generator strategy that you want to adopt for life. If in any given moment you have a feeling that you over played and may think it's time to slow down, I recommend that you join a second trusted Casino and continue there.

Think of this game as a real infinite money generator for a moment, of course you are free to do whatever you want with the money. What I would suggest, is that you invest portion of your wealth in other places that you think it would be profitable, like real estates, stock market, or maybe invest, start the business you wanted to build all these years.

I want to be useful here. When you came in realization that you have more money than you need, you will maybe realize that other things are also important in life. I realized that a while ago.

My goal to earn at least \$30k a month is because I want to help others, contribute in the world, Invest in non-profit organizations I'm interested in, in something I'm really passionate about, like raise funds for better educational subjects, donate for charity, help others in danger, etc...

I would recommend to do the same thing, after all that's the main reason why I share this with you.

I want to motivate and inspire people to be good, stay good, make a difference. I suggest that you do the same, donating extra portion of your wealth where you feel you should... In the end it's never and will never be about the money... It's about, family, happiness, piece, joy, love...

(Don't worry if the bulb didn't lighted, sooner or later it will... you will get what I said with the last sentence ;))

PS: English is my second language, I did my best here, if there is some misconcpetions, or you want to reach me out for any reason email me at nikolov_m@yahoo.com.

Now, what are you waiting for? It's money generation time!

Best, Regards,

Martin Nikolov, a.k.a ZEUS
